Online Teacher-Course Evaluation

Interpretation guidelines

The value "6" represents "Strongly Agree" while the value "1" represents "Strongly Disagree". Keep in mind that students completing their course evaluations does not necessarily mean they answered each question. As a result, for some items, you may notice that the total number of responses is lower than it is for others. In these cases, the student decided to skip this question. Students also may have skipped the open-ended question, thus leaving you with fewer responses in this section.

Teaching Assistant	Course
Francisco Poggi	MECNX_433-0_125: Analyt Approach to Uncertainty

TA QUESTIONS

Please rate the TA on the following criteria:

(Please note that TA related questions should only be answered if you interacted with the TA and can evaluate their performance)

1. The TA was able to answer the students' questions adequately.	2. The TA was well prepared for each session.

OPEN-ENDED QUESTIONS

What are the primary strengths and weaknesses of the teaching assistant?

Comments
He was available to explain anything we needed.
very knowledgeable
Francisco was very patient and had a wonderful subject matter expertise.
Clear
Francisco was incredibly responsive and checked back with me when I had questions.
Learnt more with Francisco in few hours than in the whole week.
Francisco was good and walked through problems in a very clear step by step manner
Francisco was great at making himself available but he looked exhausted and seemed rushed bc there was such demand (so many students wanted to se him)
Francisco is very patient and explains concepts clearly.
The process of having an appointment at the beginning was very difficult; had to que in zoom for hours. This could be better by allocating time by group or something different in advance.
well prepared. He seemed a little overworked.
Francisco was very helpful and patient with the answers. He did not mind staying back late if he could help the students. Overall very professional and helpful.
He was very patient and had the ability to explain with analogies
Francisco was excellent in clarity in answering the questions. There was limited time to interact during the first day of his availability and I believe that is due to the fact that everything has to be done over Zoom call and he couldn't spend enough time with everyone. Things would have been a lot different if we were in person. I understand it is not anyone's fault.
TA is great with concepts and very patient. We could not get much time from him though.I wish we could have more time to engage with him
He was very friendly and patient.
He is very intelligent and willing to help. I did not observe any weaknesses from him.
I know the timing was difficult, but the lack of advance notice of office hours was frustrating for us, as well as likely for Francisco.
I thought Francisco did a fabulous job helping students through a difficult set of material. He was more than accommodating and often bent over backwards to help ensure the students understood the subject.
Francisco was excellent in making the time and accommodating our team's questions. In addition to answering the specific question, we thought adding more color to those concepts with relevant examples would have helped (so team members coming from different professional backgrounds can related to concepts).
